Job Opportunities in Arizona 2003-2013

What are the fast growing occupations in Arizona? Which occupations have the most openings?

Arizona continues to be one of the fastest growing states, in both population and job growth. Population often grows faster in Arizona than employment, intensifying the competition for many of the better paying jobs. While not every one coming to Arizona is seeking employment, there are many situations where there are more job seekers than job openings. For those interested in the Arizona job market, it is helpful to know which occupations and industries have the most opportunities and job openings.

Job openings occur when new jobs are created in the economy (job growth) and from workers leaving an occupation (separations). Workers leave an occupation or job for a myriad of reasons: promotions, retirements, relocations, career changes, personal or professional conflicts, etc. While not all workers leaving an occupation are replaced, many openings are the result of separations. In Arizona, the number of openings created from growth is projected to be only slightly more than the openings created from separations in the time period between 2003 and 2013. The list of fastest growing occupations in Arizona has many health care related occupations, especially occupations with designations in the job titles such as Technicians, Assistants, Therapists, Technologists, Aides, and related. Also in the fast growing list are occupations in Education, Social Work, Computer Support, and Construction.

Because some individual occupations have a much larger employment base to start with, they will have a larger number of openings despite a slower growth rate percentage. For example, even though the projected growth rate between 2003-2013 for the top three fastest growing occupations, Physician Assistants (78%), Medical Assistants (77%), and Respiratory Therapy Technicians (75%) is about triple the growth rate of Retail Salespersons (26%), the estimated 2003 base employment of Retail Salespersons (67,447) is more than four times that of the top three fastest growing occupations combined (14,806). So there will be significantly more total projected openings in Retail Sales (42,316) in the ten-year period between 2003 and 2013 than in the three fastest growing occupations combined (14,068), even though each of those three occupations are projected to almost double in size.

Thus, in addition to a list of fast growing occupations, it is worthwhile to also consider the list of occupations with the most openings when analyzing the job market. In addition to Retail Sales, a few examples of occupations with the most openings include Office Clerks, Food Service Workers, Registered Nurses, Customer Service Workers, Landscaping/Groundskeeping Workers, Elementary School Teachers, Cashiers, and Construction Workers, to name a few.

Another factor to consider is the ratio of separations compared to base employment and growth. When occupations have an unusually high number of openings from

separations, it can indicate high turnover and /or that many workers use this occupation as a "stepping stone", "stop-gap", or "survival job", until they can move on to something else. The occupational projections data provided by the Arizona Department of Economic Security Research Administration itemizes the projected number of openings from separations as well as the openings from growth for each occupation.

Following this narrative are two lists of occupations, with each list containing two pages of information. In the first list, "Arizona's Fast-Growing Occupations", the occupations are ranked by percentage growth rate. The second list, "Arizona Occupations With The Most Openings", ranks occupations by total annual openings (growth openings plus openings from separations). Both lists show 2003 estimated and 2013 projected occupational employment, the numerical and percentage change, the number of projected separations, total openings, and average hourly wages. The lists also contain some explanatory footnotes.

It is interesting to note that almost 15% of the occupations are on both lists. Many of the occupations that appear on both lists are health care related, such as Registered Nurses, Licensed Practical Nurses, Dental Assistants, Medical Assistants, and Medical Lab Technicians. Also on both lists are Police & Sheriff Patrol Officers, Sales Managers, Home Care Aides, Nursing Aides, Receptionists & Information Clerks, Cement Masons & Concrete Finishers, and Drywall & Ceiling Tile Installers.

The data for these two lists are from the 2003-2013 Occupational Employment Projections and the 2003 Occupational Employment Survey (OES) prepared by the Research Administration of the Arizona Department of Economic Security, in cooperation with the United States Department of Labor, Bureau of Labor Statistics. The projections presented should be viewed as indicators of relative magnitude and probable direction rather than as forecasts of absolute occupational demand. Furthermore, the occupational forecasts are only measures of expected employment and demand for labor and indicate little about future labor supply.

The occupational data contained in the four pages of the following two lists represents over 65% of the job opportunities projected between 2003-2013. However, this is only a sample of the occupational data available and the readers are encouraged to also review the 46 pages of data available in the combined data file, which contains more detailed occupational projections, wage data, and educational and training requirements for almost 700 occupations in Arizona. The combined data file is online at: http://www.workforce.az.gov/?PAGEID=67&SUBID=144

More data for further analysis of the Arizona job market are available online at the same page cited above. First, there are short-term (2003-2005) occupational projections. Next, for more detailed wage data, such as occupational wages by industry, by county and MSA, and annual wages, look under the heading "Occupational Employment and Wage Estimates" on this page. And as they become available, sub-state occupation projections will be posted to this page.
